PROPOSAL

Light Electronic Action Framework (LEAF) Platform Support Services

Prepared for:

Location: Detroit, MI

Date: November 09, 2026

Prepared by: Carl E. Jones III

Hidden Leaf Networks LLC — Detroit, Michigan — hiddenleafnetworks.com

SOURCES SOUGHT RESPONSE

Date: November 07, 2026 **Reference:** VA-27-00002209 **Subject:** Light Electronic Action Framework (LEAF) Platform Support Services **NAICS Code:** 541512

To: Vanessa Woodward **Email:** vanessa.woodward@va.gov

From: Carl E. Jones III, Founder & Principal Hidden Leaf Networks, LLC Detroit, Michigan carl@hiddenleafnetworks.com https://www.hiddenleafnetworks.com

1. Company Identification

Field	Value
Legal Name	HIDDEN LEAF NETWORKS, LLC
CAGE Code	26PF4
UEI	X6B2SPZ64KP3
SAM.gov Status	Active
Business Size	Small Business
Business Type	Single-Member LLC
Primary NAICS	541512 — Computer Systems Design Services
Additional NAICS	541519, 541511
Location	Detroit, Michigan
Year Established	2025

2. Capability Overview

Hidden Leaf Networks, LLC (HLN) is a Detroit-based small technology business providing platform support engineering, software quality assurance, secure application development, and AI/ML systems integration. HLN combines deep technical expertise in multi-service workflow platforms, test automation, and low-code/no-code tooling support to deliver reliable, maintainable platform operations.

HLN understands that LEAF is a VA-specific workflow and low-code application development platform. Our experience building and operating multi-service workflow systems positions us well for LEAF platform support, maintenance, and operations work.

Core Capabilities:

- Platform support and maintenance engineering for multi-service workflow environments
- Low-code/workflow platform operations — configuration, testing, and user enablement
- Secure application development and platform modernization
- Software quality assurance — automated regression testing, smoke testing, and validation workflows
- IT workflow automation and process optimization
- Technical documentation, runbooks, and system administration support

HLN's experience building **HLN Relay** — a multi-service workflow platform with a layered architecture spanning UI, orchestration engine, and governance layer — demonstrates direct transferability to LEAF platform support and operations. Building and maintaining a workflow platform at this level requires the same operational discipline required to support LEAF.

3. Relevant Experience

HLN is a newly established LLC. While the company does not have federal contract past performance, our principal brings over 12 years of directly relevant experience in platform operations and workflow systems engineering.

Carl E. Jones III — Founder & Principal Engineer

- 12+ years in software QA, test automation, and systems engineering — including platform regression testing and release validation workflows
- Ford Motor Company — enterprise platform QA across complex multi-system environments; directly analogous to maintaining operational stability of a VA workflow platform like LEAF
- HLN Relay — built and operates a multi-service workflow platform with layered architecture (UI, orchestration, governance); hands-on experience with the full support lifecycle from development through operations
- ARIA Platform — multi-service AI orchestration system (10-agent registry, 600+ tests) demonstrating disciplined platform engineering with automated test coverage and monitoring

- Full-stack application development with modern frameworks (Python, TypeScript, React, FastAPI, Docker, Kubernetes)
- Technical documentation, runbook authoring, and system administration

4. Teaming Arrangements

HLN is open to teaming arrangements with large or small businesses to provide the full scope of services required. HLN's cybersecurity, QA automation, and AI/ML capabilities complement larger integrators' infrastructure and program management strengths.

5. Questions and Concerns

1. Will this requirement be set aside for small business under NAICS 541512?
2. What is the current LEAF platform technology stack?
3. Is there an incumbent, and what is the transition timeline?

6. Interest Level and Set-Aside Recommendation

Hidden Leaf Networks, LLC expresses **strong interest** in the requirements described in VA-27-00002209. HLN is a registered small business and believes this requirement is suitable for a **Total Small Business Set-Aside** under NAICS 541512.

HLN is prepared to provide additional information, participate in industry days, or discuss capability demonstrations as requested.

Respectfully submitted,

Carl E. Jones III
