PROPOSAL

Mission-Oriented Services for Application Integration

Prepared for:

Location: Detroit, MI

Date: November 09, 2026

Prepared by: Carl E. Jones III

Hidden Leaf Networks LLC — Detroit, Michigan — hiddenleafnetworks.com

SOURCES SOUGHT RESPONSE

Date: November 07, 2026 **Reference:** VA-27-00015330 **Subject:** Mission-Oriented Services for Application Integration **NAICS Code:** 541512

To: Juan C Perez **Email:** juan.perez5@va.gov

From: Carl E. Jones III, Founder & Principal Hidden Leaf Networks, LLC Detroit, Michigan carl@hiddenleafnetworks.com https://www.hiddenleafnetworks.com

1. Company Identification

Field	Value
Legal Name	HIDDEN LEAF NETWORKS, LLC
CAGE Code	26PF4
UEI	X6B2SPZ64KP3
SAM.gov Status	Active
Business Size	Small Business
Business Type	Single-Member LLC
Primary NAICS	541512 — Computer Systems Design Services
Additional NAICS	541519, 541511
Location	Detroit, Michigan
Year Established	2025

2. Capability Overview

Hidden Leaf Networks, LLC (HLN) is a Detroit-based small technology business providing application integration engineering, API development, AI/ML systems integration, and secure application development. HLN combines deep technical expertise in multi-system orchestration, service-to-service integration patterns, and cross-platform data flow to deliver reliable, mission-ready integration solutions.

Core Capabilities:

- Application integration and API development — RESTful, event-driven, and async patterns
- Multi-service orchestration and middleware engineering
- Cross-platform AI/ML integration (multi-model routing, agent-to-agent interoperability)
- Secure application development (Python, TypeScript, FastAPI, Next.js)
- Software quality assurance and automated integration testing
- IT workflow automation and end-to-end orchestration
- Technical documentation and integration specifications

HLN's **ARIA Platform** — a production AI orchestration system integrating 10 agents across 3 live providers with cross-surface Agent-to-Agent (A2A) interoperability — serves as direct proof of mission-oriented application integration at scale. HLN's **HLN Relay** further demonstrates multi-service workflow integration with a layered architecture connecting UI, orchestration, and governance components across a unified platform.

3. Relevant Experience

HLN is a newly established LLC. While the company does not have federal contract past performance, our principal brings over 12 years of directly relevant experience in systems integration, multi-platform engineering, and mission-critical application development.

Carl E. Jones III — Founder & Principal Engineer

- 12+ years in software QA, test automation, and enterprise systems engineering
- Ford Motor Company — integration testing across multi-system manufacturing environments; proven ability to validate integration correctness at scale
- ARIA Platform — production multi-model AI orchestration system with a 10-agent registry, 3 live provider integrations, cross-surface Agent-to-Agent (A2A) protocol, and 600+ automated tests; demonstrates end-to-end application integration engineering
- Scroll CLI — multi-engine AI routing platform integrating 5 providers (Anthropic, xAI, OpenAI, Google, local) with unified interface; direct experience building abstraction layers over heterogeneous service backends
- HLN Relay — multi-service cybersecurity workflow platform integrating UI, orchestration engine, and governance layer; demonstrates integration architecture across layered service boundaries

- Full-stack application development with integration-first frameworks (Python, TypeScript, FastAPI, Docker, Kubernetes, REST/event-driven APIs)

4. Teaming Arrangements

HLN is open to teaming arrangements with large or small businesses to provide the full scope of services required. HLN's cybersecurity, QA automation, and AI/ML capabilities complement larger integrators' infrastructure and program management strengths.

5. Questions and Concerns

1. Is this requirement anticipated to be set aside for small business?
2. What integration platforms or middleware are currently in use?
3. What is the estimated period of performance?

6. Interest Level and Set-Aside Recommendation

Hidden Leaf Networks, LLC expresses **strong interest** in the requirements described in VA-27-00015330. HLN is a registered small business and believes this requirement is suitable for a **Total Small Business Set-Aside** under NAICS 541512.

HLN is prepared to provide additional information, participate in industry days, or discuss capability demonstrations as requested.

Respectfully submitted,

Carl E. Jones III
